WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Weather models are indicating “mid-level” monsoon moisture will move from south to north across the Central Coast and Bay Area regions today through Tuesday.
- This mid-level moisture will potentially interact with increased instability to produce isolated to scattered high-based rain showers and/or thunderstorms. While some precipitation may reach the surface, there remains the potential for dry lightning.

SOUTHERN CALIFORNIA

- Multiple Flash Flood Watches are in effect today for portions of Riverside County and San Bernardino County due to a monsoonal system moving from the east to west through the area today.

WEATHER KEY POINTS

07/26/21 - 08/01/21

Monday-Sunday

- Fire weather conditions remain elevated through the upcoming week, especially across the foothills and mountains where locally gusty winds are likely each afternoon and evening
- Isolated to scattered showers and thunderstorms remain possible each day, with the best coverage of storms in the Sierra and in the deserts and mountains of Southern Region
 - Storms will be most widespread across the state Monday into Tuesday, including a slight chance of thunderstorms in portions of Coastal Region and in Inland Region valleys
 - **Some storms across southern California on Monday could produce locally heavy rainfall, which could lead to flash flooding, including on recent burn scars**
 - Some thunderstorms, especially in the Sierra and other northern mountains, could be relatively dry and lead to new fire starts
- Temperatures will remain warm, with low to moderate heat risk impacts possible across the state through much of the week, but no widespread excessive heat impacts are currently expected this week
